SUMMARY

Versatile and result-driven Full-Stack & Mobile Developer proficient across Flutter, React, Django, and Node.js, backed by a solid foundation in Linux, Git, and database management. Experienced in bridging hardware and software via real-time telemetry pipelines and training AI/computer vision models for practical applications.

SKILLS

- **Language/Frameworks:** Flutter, Python, JavaScript, MySQL, Postgres, React, Django
- **Libraries / Platforms:** Tailwind CSS, Bootstrap, Firebase, Odoo
- **Tools & Environment:** Linux, Git, GitHub, Nginx, Node.js

PROFESSIONAL EXPERIENCE

EFS SystemCore

June 2025 - Present

Software Developer | Release Manager

- Developed and deployed a system to digitize legacy business processes, improving cross-departmental data accuracy and operational transparency.
- Eliminated redundant workflows by automating inventory and procurement modules, reducing manual data entry requirements by approximately 40% and accelerating order fulfillment cycles.
- Developed a utility workbench web system to automate common HR operations and accelerate workflows.
- Built a mobile app for attendance, event, and personal data management and tracking.

Marathon Tracking System (Project-based)

Aug 2024 - Dec 2024

Software Developer

- Built a high-performance administrative dashboard featuring a real-time monitoring interface to track and visualize telemetry data from multiple concurrent device trackers.
- Developed a secure end-to-end data pipeline (bridge) connecting hardware trackers and backend services.

E-Wallet Kiosk System (Project-based)

May 2024 - Aug 2024

Software Developer

- Built a computer vision-based currency recognition system by training an AI model and achieving high-accuracy detection and classification of various denominations of Philippine Peso bills.
- Developed a centralized application for real-time auditing and device management.

EDUCATION

University of Science and Technology of Southern Philippines - Oroquieta Campus

B.S in Information Technology

- Cum Laude with 1.64 GPA.
- Developed a block-based mobile programming game.
