EDUCATION

University of Science and Technology of Southern Philippines - Oroquieta Campus

B.S in Information Technology

- Cum laude with 1.64 GPA
 - Developed a block-based programming game for mobile with a responsive, web-based admin panel for managing user data and game content.
-

EXPERIENCES

Durong's Malunggay Pandesal

June 2025 - Present

Software Developer | Release Manager

- Coordinated with a 3 person team to develop and deploy a comprehensive Odoo ERP system to digitize legacy business processes, improving cross-departmental data accuracy and operational transparency.
- Eliminated redundant workflows by automating inventory and procurement modules, reducing manual data entry requirements by approximately 30% and accelerating order fulfillment cycles.
- Built custom analytical reports and dynamic views using Python and XML, providing leadership with real-time visibility into key performance indicators (KPIs) to support data-driven decision-making.

Department of Interior and Local Government (Project-based)

Jan 2025 - May 2025

Software Developer

- Developed user access, authentication, and other functionalities for a report submission & management system
- Implemented secure login and role-based access control to enhance system security.
- Collaborated with a 2 person team to integrate authentication mechanisms efficiently.

Marathon Tracking System (Project-based)

Aug 2024 - Dec 2024

Software Developer

- Engineered a high-performance administrative dashboard featuring a real-time monitoring interface to track and visualize telemetry data from multiple concurrent device trackers.
- Developed a secure end-to-end data pipeline (bridge) connecting hardware trackers, backend services, and the web interface, ensuring sub-second latency and data integrity.

E-Wallet Kiosk System (Project-based)

Sept 2024 - Nov 2024

Software Developer

- Engineered a computer vision-based currency recognition system by training a custom YOLO (You Only Look Once) AI model using PyTorch, achieving high-accuracy detection and classification of various denominations of Philippine Peso bills.
 - Developed a centralized web application for real-time auditing and device management, enabling administrators to monitor kiosk liquidity and hardware health remotely.
-

TECHNICAL SKILLS

- **Language/Frameworks:** Dart, Flutter, PHP, JavaScript, SQL, Tailwind, Bootstrap, XML, Python
- **Technologies:** Firebase, Linux
